

Combining fork and execv

```
main()
{
    char *args[4];
    /* set args here */
    rc = fork(); /* returns 0 to child, pid to parent */
    if (rc == 0) {
        status = execv("/testbin/argtest", args);
        printf("If you see this execv failed\n");
        printf("status = %d errno = %d\n", status, errno);
        exit(0);
    } else {
        child_pid = rc;
        parent_code();
        p = waitpid(child_pid, &child_exit, 0);
    }
}
```
